REVIEW OF MARKETS

FINANCIAL AND COMMERCIAL

Stocks, Money, Exchange, Bonds, Grain, Cotton, Provisions, Etc.

These Are Closing Sales Each Day.

New York, Sept. 27.—To-day's note-worthy advance in prices of stocks were primarily due to the existence of a large outstanding short interest. Commercial bills of exchange for cot-ton are coming forward in such force as to relieve apprehension as to the to relieve apprehension as to the lity of the New York money market to meet its future obligations on the German and British exchequer loans without export of gold. The downward course of exchange is so vicolent as to give rise to some expecta-tion that gold will move this way. That such a movement could be forced in case of necessity is very evident, and that it will be unless foreign money rates advance is very proba-ble.

money rates advance is very probable.

The strength of the stock market, growing into buoyancy, was continuous after an opening dip in prices, due to the chagrin of the bears, who were driven to cover last night on a rumor of the coal strike settlement, which was not confirmed this morning. The extreme advances in the coalers ran up to 3½ in New Jersey Central and the leading specialties, and local traction stocks recovered from 2 to 3½ points. In the active railroad list net gains 1 to 2 points are the rule, with the closing active and strong at about the top.

Bonds improved in sympathy with stocks, the speculative issues leading. Total sales, par value, \$830,000.

U. S. new 4's advanced 4c. in the bid price.

The total sales of stocks to-day were 432,400 shares.

The Cotton Markets.

NEW YORK COTTON MARKET.

New York, Sept. 27.—The cotton market was comparatively quiet and prices at the outset took a lower level, especially as to the immediate and nearby positions. The market opened here at a decline of 25 points for September, while the later positions declined 5@ 10 points. Liquidation was active. Prices yielded 4@5 points further. Speculation became very slack later in the session, but a movement to cover short contracts caused a reaction of 11@18 points. Sellers withdrew altogether or showed a disposition to be conservative in view of the considerable decline in prices. Liquidation set in again near the close and carried prices off again to the low point of the day. The market closed barely steady at a net loss of 7 to 30 points, the latter in September only.
